

Pascal Neuville and Patrick Reimeringer join Axilum Robotics' Board of Directors

October 10th 2011- Strasbourg, France

Announcement:

Strasbourg, France – October 10th 2011 - Axilum Robotics, the French start-up dedicated to the development of medical robots, announced that Pascal Neuville and Patrick Reimeringer have been elected to Axilum Robotics' Board of Directors.

« Pascal and Patrick are both experienced and successful managers and we look forward to their contributions as members of Axilum Robotics' Board » said Michel Berg, Axilum Robotics' CEO and co-founder. « We think Pascal and Patrick's insights and entrepreneurial and industrial skills will be very valuable in supporting the development of Axilum Robotics in the years ahead. » « I've found their concept very advanced and I believe in the potential of the project. It is a pleasure to become a board member to help the company's managers, especially in the industrialization process » Patrick Reimeringer added.

Pascal Neuville is CEO of Domain Therapeutics. He owns a PhD in molecular biology from Strasbourg, France. He spent five years at the University of Geneva, Switzerland, as a post doc and then as Assistant Professor. Then Pascal joined Transgene where he was R&D project leader. From 2002 to 2008, he was CSO of Faust Pharmaceuticals, a drug discovery and development company in CNS. Pascal Neuville was also president of the board of Alsace BioValley, the life science competitiveness cluster of Alsace, France, from 2008 to 2010 and is currently board member.

Patrick Reimeringer has more than 15 years of experience in various industrial environments and has now been working since 2001 for the German Group Bürkert, a worldwide acting company in Fluid Control Systems (valves, sensors...). He is the production manager of the French factory, specialised in Sensor technologies. Patrick owns a Master of Engineer Sciences from Strasbourg University, France, in 1996, and a Master of Business and Administration from the Liverpool John Moores University, UK, which he completed in 2008.

About Axilum Robotics

Axilum Robotics is committed to develop and commercialize robotized solutions to assist Health Care Professional with medical procedures. The first project of Axilum Robotics is a robot to assist psychiatrists and neurologists for Transcranial Magnetic Stimulation (TMS). The project has been certified by Alsace Biovalley life science cluster, and has been selected for funding through Interministerial Unique Fund (FUI). Located in Strasbourg, France, Axilum Robotics is working with its partners to transfer medical robotic technology research into a growing industry in Alsace.
