NON-INVASIVE TRANSCRANIAL BRAIN STIMULATION LEVERAGING THE FULL POTENTIAL

The NTBS Winter-School in Copenhagen is an intensive four-day workshop providing participants with in-depth knowledge of the most common non-invasive transcranial brain stimulation techniques (TMS/TDCS/TACS).

The workshop is tailored to researchers and clinicians who wish to gain extensive insight into the basics and state-of-the art application of non-invasive brain stimulation. The workshop covers basic physical and physiological principles, electric field modeling, and a wide range of cognitive and clinical applications. A special focus will be put on multimodal combinations of NTBS with other neuroimaging techniques (EEG, fMRI). All teaching modules are accompanied by hands-on sessions and demonstrations.

Address

DRCMR

Copenhagen University Hospital Hvidovre
Kettegaard Alle 30
DK-2650 Hvidovre

Date

27–30 November 2018

Cost

€ 580 (Students € 290)

including reading materials, coffee/tea,
light lunches & social dinner

Info & Registration

www.drcmr.dk/ntbswinterschool
ntbswinterschool@drcmr.dk

Faculty

Prof. Hartwig Siebner
Ass. Prof. Axel Thielscher
Prof. Frank Padberg
Dr. Anke Karabanov
Janine Kesselheim, MSc

Practical Information

Course language English
Certificate after course completion
Reading materials provided on first day
